

Press Release

L'Union 31240, France - 3 February 2026

 **Ascentry**

Ascentry and TECHNIDATA are continuing their partnership to provide laboratories with a comprehensive, fully integrated solution.

Ascentry, a specialist in middleware solutions, and TECHNIDATA, a major player in Laboratory Information Systems (LIS), announce the renewal of their strategic partnership.

The objective: to provide medical laboratories with a unified, high-performance, and secure solution that addresses the growing challenges of integration, automation, regulatory compliance, and quality of care.

This collaboration, already proven through numerous projects in healthcare institutions, reflects a shared ambition: to streamline workflows, enhance operational performance, and ensure the highest quality of care. By combining Ascentry's middleware expertise with TECHNIDATA's LIS know-how, the two companies aim to support laboratories in their digital transformation with innovative, interconnected solutions.

This momentum is already materializing with the January 2026 launch of the new version of ^{TD}Mind, resulting from the integration of Ascentry's agnostic middleware into ^{TD}NexLabs, TECHNIDATA's general laboratory information system. This major release delivers significant advancements:

- Strengthened business continuity
- Optimized integration with the laboratory's application ecosystem
- Redesigned user interface and improved usability

Cédric Garnier, Managing Director of TECHNIDATA: « *This agreement marks a key milestone in delivering increasingly powerful software solutions to our clients and supporting the growth of both our companies, in France and internationally.* »

Cyril Verhille, CEO of Ascentry « *We are very proud to renew this partnership initiated a few years ago and to support TECHNIDATA in its new momentum. This partnership also aligns fully with our international growth strategy.* »

About Ascentry

Ascentry is a global leader in healthcare data management solutions, enabling clinical laboratories, healthcare facilities, and IVD vendors to operate with clarity, speed, and confidence. The company's solutions are used in more than 5,000 customer sites across numerous countries worldwide, helping to ensure the right results for every patient, every time. Ascentry's expertise spans clinical laboratory data management, epidemiological monitoring, and the prevention of healthcare-associated infections, delivering scalable, high-performance software that addresses today's most complex challenges. This partnership is fully aligned with Ascentry's strategy, as the company remains completely independent and open to all laboratory environments.
